

Above and Below Ground Cipher® Nitrogen Protection

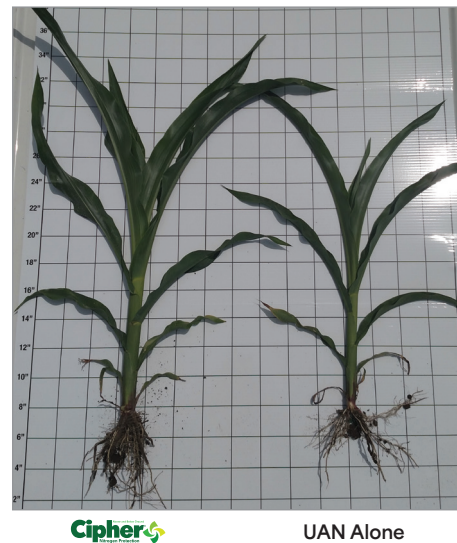

Above- and Below-Ground Nitrogen Protection Designed for UAN

Features & Benefits of Cipher

- Cipher is a unique combination of NBPT (*urease inhibitor*) and DCD (*nitrification inhibitor*)
- Protects nitrogen from leaching and volatility and keeps nitrogen in the root zone when the plant needs it
- Both active ingredients are recognized by the NRCS as effective methods to stabilize nitrogen
- Designed for use with UAN pre-plant and/or side-dress
- Easy handling and low odor

RATE
