

Enfield™

Herbicide

A CORNERSTONE SOLUTION FOR BROAD SPECTRUM WEED CONTROL

Broad-Spectrum Weed Control

Delivers superior control with a wide application window, from preplant through postemergence applications on corn up to 24 inches tall

3 Modes of Action

Provides broad-spectrum performance adaptable to a wide range of corn cropping systems

Formulation Quality

Features an encapsulated acetochlor formulation for ease of handling and excellent crop safety

Tank Mix Flexibility

Offers compatibility with a broad range of agricultural products for convenient tank mixing

Increased Yield Potential

Supports long-lasting, broad-spectrum weed control to help protect yield

Resistance Management

Combines multiple modes of action with enhanced stewardship to help growers combat resistant weeds

Labeled Crops:

Corn (Grain, Seed or Silage) and Yellow Popcorn

Application Timing:

Preplant, Preemergence (after planting but prior to crop emergence), or Postemergence (after crop emergence, up to 24 inches tall) Preemergence Only on Yellow Popcorn

Target Pests:

Control of More Than 75 Broadleaf Weeds and Grasses

Active Ingredients:

Acetochlor + Mesotrione + Clopyralid

Modes of Action:

Long Chain Fatty Acid Inhibitor (Group 15) + HPPD Inhibitor (Group 27) + Plant Growth Regulator (Group 4)

Use Rates:

Soil Texture	Rate Per Acre	
	Soil Organic Matter Content	
	Less than 3%	3% or Greater
Coarse	2.25 qt	2.50 qt
Medium	2.50 qt	2.75 qt
Fine	2.75 qt	3.00 qt

Split Application:

PRE – 1.5 qt fb POST – 1.5 - 2 qt
