

# AbbeloN<sup>TM</sup>

Maximized Urea Protection

## Product Overview

- ▶ AbbeloN is a unique combination of NBPT (urease inhibitor) and DCD (nitrification inhibitor) for dual-mode nitrogen protection
- ▶ Protects nitrogen against volatility and leaching, keeping it available in the root zone when crops need it most
- ▶ Harnesses a proprietary solvent blend
- ▶ Improve operational efficiency, from the blender to the spreader
- ▶ Offers industry-leading handling and impregnation properties

### EXTENDED GROWTH

Keeps nitrogen in plant-available forms longer into the growing season to promote greater nutrient uptake and support higher yield potential.

### INDUSTRY-LEADING HANDLING

Harnessing a proprietary solvent blend, AbbeloN provides exceptional handling and impregnation, without sacrificing nitrogen stabilizing qualities.

### SURFACE-TO-SOIL PROTECTION

Powered by proven nitrogen stabilizing technology, combining NBPT for above-ground protection and DCD for below-ground defense.
