

DECLARE[®]

INSECTICIDE

BROAD SPECTRUM INSECT CONTROL

Next Generation Pyrethroid

A resolved, pure isomer, next generation form of Cyhalothrin

Low Use Rates

Utilizes low rates of active ingredient compared to other pyrethroids

Formulation Quality

Microencapsulated formulation providing ease of handling and excellent rainfastness

Excellent Insect Activity

Provides quick, broad spectrum control with long residual

Tank Mix Flexibility

Can be tank mixed with other agricultural products

Increased Hot Weather Performance

Greater efficacy than other pyrethroids in hot weather

Labeled Crops:

Broad label including Corn, Cotton, Soybeans, Alfalfa, Wheat, Vegetables and other crops

Application Timing:

Foliar insecticide

Target Pests:

Corn Earworm, Cutworm species, Bean Leaf Beetle, Thrips species, Soybean Aphids, Armyworm, Grasshopper, Flea Beetle species, Japanese Beetle (Adult), Stink Bug species and many more

Active Ingredient:

Gamma-cyhalothrin

Modes of Action:

Pyrethroid (Group 3A)

Use Rates:

Rates vary depending upon target pest. See label for specific rates.
