

DOMINANCE™

Herbicide

LONG-LASTING RESIDUAL
WEED CONTROL WITH
APPLICATION FLEXIBILITY

Broad Spectrum Control

Strong residual grass and broadleaf control

Long-Lasting

Long-lasting residual control of grass and broadleaf weeds including Waterhemp, Lambsquarter, and Foxtails

Flexible Application Timing

Provides flexible application timing for unpredictable spring seasons from 14 days preplant to 30-inch tall corn

Tank Mix Flexibility

Built to allow flexibility with tank mix options that cater to a variety of agronomic situations

Labeled Crops:

Corn (Field, Seed, Yellow Popcorn, Sweet Corn) and Grain Sorghum

Application Timing:

Preplant burndown, Preplant Incorporated, Preemergence and Postemergence

Target Weeds:

Annual grasses, Lambsquarters, Pigweed, Waterhemp, Palmer Amaranth, Black Nightshade, Ragweed and Velvetleaf

Active Ingredients:

Metolachlor and Mesotrione

Modes of Action:

Seedling Shoot Growth Inhibitor (Group 15), HPPD Inhibitor (Group 27)

Use Rates

1.0 – 2.4 qts (depending upon application timing and methods)
