

**EXCELLENT
POSTEMERGE
CONTROL ON THE
TOUGHEST-TO-
CONTROL WEEDS**

Effective Planned Spray Application

Strong front-line postemergence corn herbicide used in a two-pass system

Powerful Control

Delivers rapid, effective knockdown and control of nearly 200 broadleaf weeds

Non-HPPD Chemistry

Helps stop growing HPPD resistance and controls tough HPPD-resistant weeds

Low Use Rate

Less volume to handle compared to other postemerge herbicides

Labeled Crops:

Corn (Grain, Seed or Silage and Popcorn)

Application Timing:

Postemergence

Target Weeds:

Multiple broadleaf weeds, including HPPD-resistant and other resistant, tough-to-control weeds

Active Ingredients:

Dicamba and Diflufenzopyr plus Safener

Modes of Action:

Plant growth regulator (group 4) + auxin transport inhibitor (group 19)

Use Rates:

Weed and Field Situations	Recommended Rate
Weeds < 4 inches	5 oz/A
Weeds > 6 inches	5-10 oz/A
Solo broadleaf weed control	5-10 oz/A
Weeds resistant to tank mix partner	5-10 oz/A
Perennial weeds (e.g. dandelion)	5-10 oz/A
