

KEEPS CROPS FUNCTIONING AT A HIGH LEVEL, MITIGATING STRESS AND INCREASING YIELD POTENTIAL

THREE MODES OF ACTION:

Protect – Activates the plant's natural stress response through regulation of key metabolic pathways, helping protect and repair the plant before, during, or after stress events

Recover – Triggers 450+ enzymatic reactions to help the plant repair more quickly from stress events while increasing photosynthesis, energy, and carbohydrate utilization for improved efficiency

Energize – Provides the fuel and energy needed to support the increased enzymatic activity occurring within the plant, resulting in improved efficiencies and higher yield potential

Use Rate:

8 fluid oz/acre

Tank Mix Compatibility:

Herbicides, fungicides, adjuvants, and micronutrients

Mitigate Plus is an Agronomic Solution for Abiotic Stress

In Furrow

- Improves microbial growth, seed germination, and seedling vigor
- Helps alleviate early stress from cool and compacted soils

Early Post

- Enhances crops' ability to metabolize and recover from herbicide stress
- Provides plants with readily available energy before critical growth stages

Late Post

- Maximizes late-season plant health when used in conjunction with a fungicide
- Improves crop response to drought conditions by regulation of stomates

FLEXIBLE CROPPING SYSTEM USE

Minimizes stress in Corn, Soybeans, Wheat, and more

SOYBEAN PERFORMANCE

Herbicide Alone

Herbicide + **MITIGATE[®] Plus**
REDUCES STRESS / MAXIMIZES YIELD

Protects Against Multiple Stressors

Helps crops withstand herbicide injury, extreme temperatures, drought, wind, and hail damage

CORN PERFORMANCE

Untreated

MITIGATE[®] Plus
REDUCES STRESS / MAXIMIZES YIELD
