

Proprietary blend of modified alkanoates, polymers, surfactants, and crop enhancement components.......100%

**STALLION™** is a premium innovative adjuvant that combines Yield Burst Technology, HPG technology, highquality MSO, and a multi-functional surfactant blend.

# **PRODUCT ADVANTAGES**

- Yield Burst Technology that provides energy to the plant
- Ultra-efficient surfactant package for increased coverage and cuticle penetration
- Industry-standard deposition, retention, and coverage technology
- Most rate active activator adjuvant per unit on the market

WITHOUT STALLION

#### **IMPROVED CROP RESPONSE:**

Less burn + increased recovery = faster row closure. Cobra® Herbicide Application | 7/24/23 7 DAT

Field received hail three days prior to application. Stallion demonstrates improved recovery from this stress event.

STALLION provides the plant essential energy to recover from natural stresses including hail, drought, cold temperatures, and other stressors.

#### **RATE**

16 oz. / A

## **PACKAGE**

2 x 2.5 gal. 250 mini

### MIXING INSTRUCTIONS

IMPORTANT: Add STALLION to the spray tank first before adding any other tank mix product, unless the tank mix pesticide(s) or additive(s) direct otherwise.

## MIXING ORDER

- Fill tank half full of water and begin agitation.
- Add the required amount of STALLION while agitating.
- Continue filling spray tank with water and add the tank mix components as directed on the pesticide label(s).
