

Plant Hormone Blend Proven to Increase Plant Growth and Development

Features & Benefits of Triad

- Contains the **right ratio and concentration** of plant hormones for optimum growth
- Enhances physiological activity in the plant to maximize yield
- Highly compatible formulation for tank mixing with fertilizers, adjuvants, and pesticides
- Boosts plant growth and development for higher yield potentials and ROI

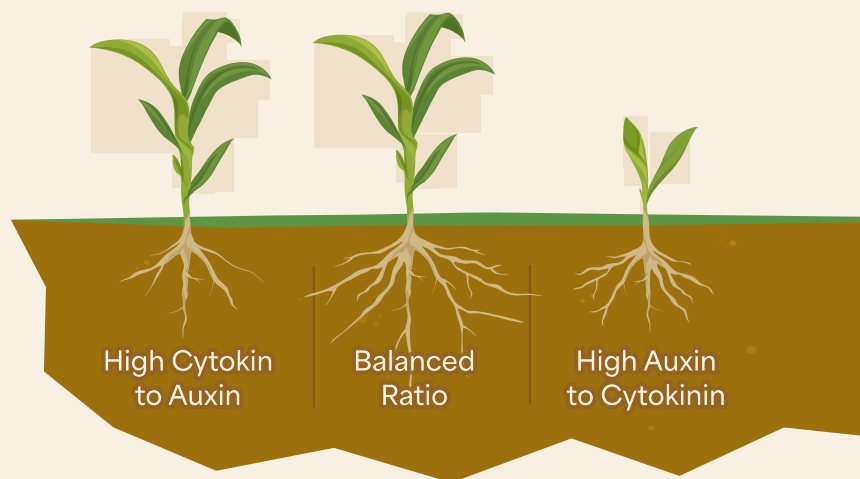

RATE
4-8 oz/A
LBS / GALLON
8.36
pH
3.43

Hormone Balance is Critical to Maximize Plant Performance and Yield Potential

Cytokinin (Kinetin) | Stimulates cell division and shoot growth, delays leaf senescence, and activates dormant buds

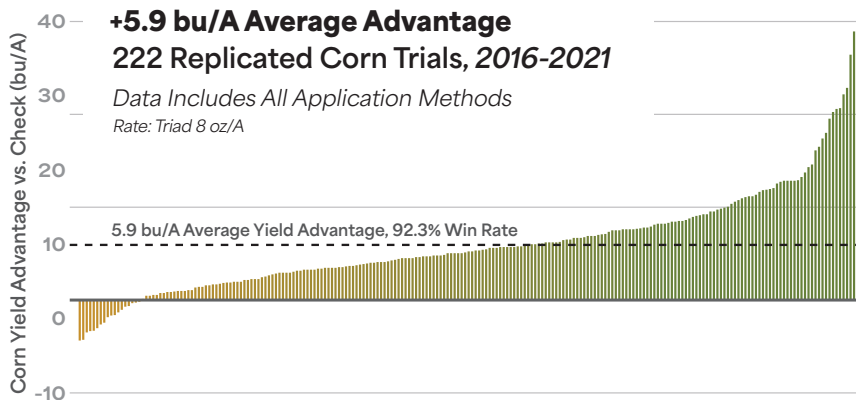

Gibberellic Acid (GA) | Stimulates shoot growth through internode elongation, as well as induces seed germination

Indole-3-Butyric Acid (Auxin) | Enhances root growth, involved in apical dominance, stimulates cell elongation, enhances fruit and seed development

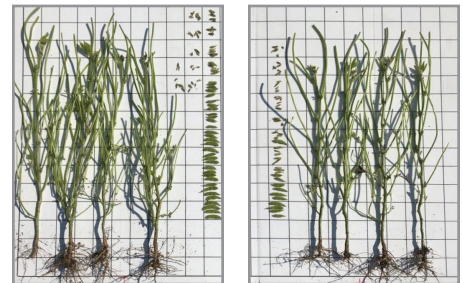

Triad Proves Itself Time and Time Again

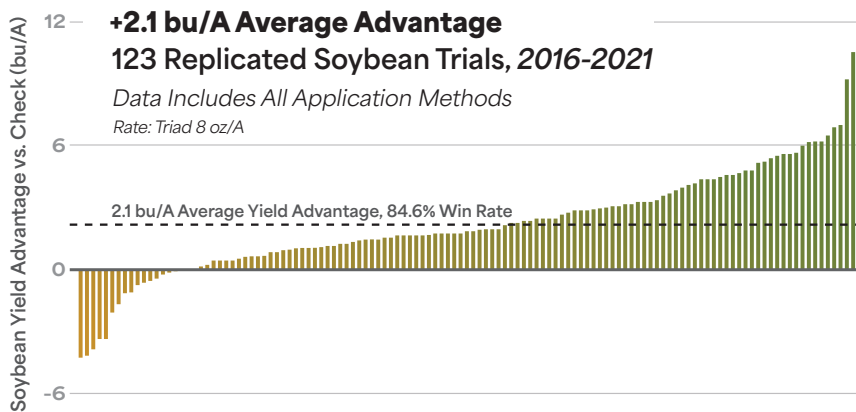

Triad Influences Soybean Growth and Branching, Promoting Significant Pod Count Increase

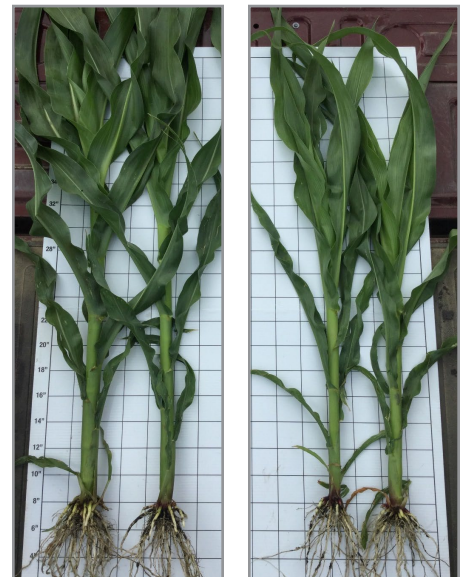

Triad

Untreated

Triad Signals a Balanced Growth Response, Increasing Above- and Below-Ground Growth
