

Broad Spectrum Control

Highly effective preplant and preemergence control of tough resistant weeds including Waterhemp and Palmer Pigweed.

Crop Safety

Unique micro-encapsulated formulation that provides effective weed control and improved crop safety.

Flexible

Flexible application window across a wide range of crops and tank mix options.

Weed Resistance Management

Ideal product for a layered residual strategy.

Labeled Crops:

Soybeans, Corn (grain, seed), Cotton, Forage and Grain Sorghum, Sugar Beets, Alfalfa

Application Timing:

Preplant, Preplant Incorporated, Preemergence, Postemerge

Target Weeds:

Annual grasses, Lambsquarters, Pigweed species, Palmer Amaranth, Waterhemp, Smartweed, and Black Nightshade

Active Ingredient:

Acetochlor

Mode of Action:

Seedling Shoot Growth Inhibitor (Group 15)

Use Rates:

See below chart for application rate and timing.

Crop	Rate	Timing
Soybeans	1.25-2 qts/A	Preplant, Preemergence, Postemergence (before R2 soybeans) Recommended before V3 to maximize soil coverage
Corn	1.5-3 qts/A	Preplant, Preemergence, Postemergence (up to 30" corn)
Cotton	1.25-2 qts/A	Preplant, Preemergence, Postemergence (up to bloom cotton)
Forage or Grain Sorghum	1.5-3 qts/A	Preplant, Preemergence, Postemergence (up to 11" grain sorghum)
Sugar Beets	1.25-2 qts/A	Postemergence (2 leaf up to 8 leave growth stage)
Alfalfa	1.25-2 qts/A	See label
